

## Marine Cell Regul·Oil

Acne and sebaceous volume often have their origin in the sebaceous glands due to the presence of overactive hormones that produce more sebum than necessary. As a result, natural bacteria found on the skin clog the pores and cause inflammation. Preventing the process by reducing and balancing the production of sebum, attacks this problem from the source.

Therefore, Regul Oil products are specifically formulated for treating oily and acne-prone skins that require specific ingredients to regulate sebum production. This range of products is able to improve the appearance of the oily skin by reducing and refining the pore size and at the same time achieves treating wrinkles and fine lines.

There are several actives to highlight whose effectiveness is scientifically demonstrated in fighting sebum excess:

**REGU®SEB** and **ALP®SEBUM** regulate sebum by inhibiting the 5 $\alpha$ -reductase enzyme, which reduces the production of testosterone and its biologically active form dihydrotestosterone (DHT). Phytosterols and lignans present in these actives are responsible for such process.

## BIO MER provides NATURAL COSMETICS...

Without parabens, without petroleum.

Without animal testing or GMOs.

Synergy between essential oils.

Organic ingredients approved by ECOCERT

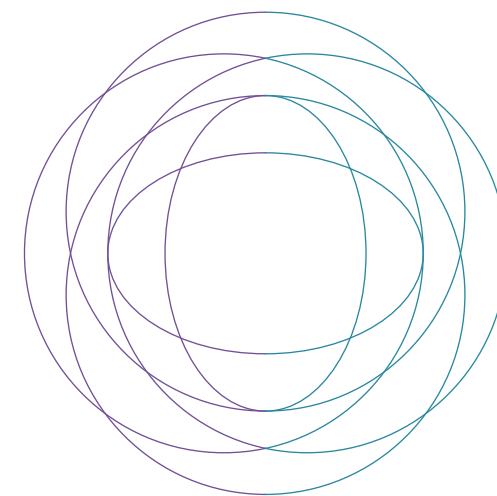

Efficacy Studies In Vivo and In Vitro

Marine Cell

a Scientific Line  
formulated for treating  
specific types of skin

## Marine Cell Lift & Refill

Specific line for **mature and dry skin** that demands visible and rapid effects in the treatment of skin aging. It contains **biotechnological peptides** that have scientifically demonstrated their effectiveness on the skin.

**SYN®AKE**

The low molecular weight peptide **SYN®AKE** (snake venom) is an alternative to Botox which effectively and immediately relaxes wrinkles and fine lines. This component mimics the action of Waglerin-1 by blocking the neuronal transmission of the nicotinic acetylcholine receptor.

**SYN®COLL**

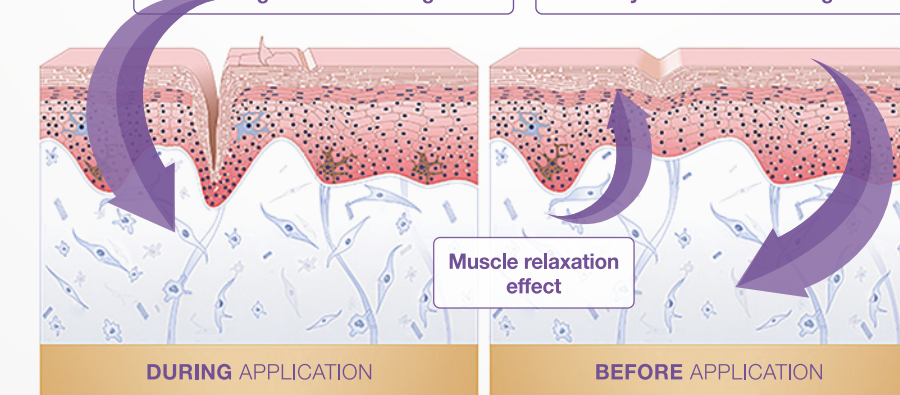

In combination with **SYN®COLL**, that stimulates collagen production via tissue growth factor Beta, the Lift&Refill line offers both an inner and outer treatment of wrinkles. In addition, it reduces significantly the signs of skin aging and photoaging by maintaining the skin firm and elastic.

**HYALURONIC ACID**

The well balanced combination of high and low molecular weight **HYALURONIC ACID** ensures the necessary hydration of our skin and fills the wrinkles from the inside.

**SYN®AKE + HYALURONIC ACID**  
High molecular weight

**SYN®COLL + HYALURONIC ACID**  
Very low molecular weight

## TREATMENT CREAM

### Marine Cell Lift & Refill

The Lift & Refill treatment cream is a clever combination of peptides and biological actives. **SYN®COLL** and **SYN®AKE** reduce the appearance of wrinkles, reaffirm the skin and improve elasticity.

*Recommended for mature skins that suffer collagen loss and need to redensify and tighten the skin tissue.*

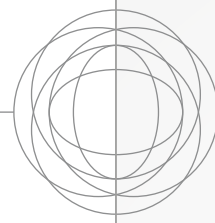

**RESULTADOS:** Efecto Botox Like no invasivo.

**APPLICATION:** Apply 1-2 times daily after a deep skin cleansing.

#### SYNERGY BETWEEN THE ACTIVE INGREDIENTS:

The biological actives that this cream contains are: organic prickly pear oil, called the **Berbers Botox** by the large amount of Vitamin E that provides, and **orchid extract** (one of the most long-living flowers in the plant kingdom) that has great antioxidant properties that help delay skin aging and regulate skin pigmentation.

As an essential sea ingredient the product includes **Mar Menor sea salt** (a cocktail of minerals and trace elements such as calcium, copper, iron, magnesium and zinc).

## TREATMENT OIL

### Marine Cell Lift & Refill

A powerful cocktail of active ingredients for cabin treatment that complements and enhances **ANTI-AGE TREATMENTS**. It is the perfect combination of vegetal oils that work on wrinkles, provide luminosity and leave a balanced skin.

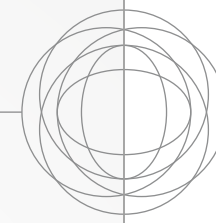

This is possible thanks to the synergetic action of prickly pear organic oil, also called **Berber Botox**, rich in Vitamin E and three times more powerful than others recognized vegetal oils, and camellia oil, which is considered **Asia's olive oil** for its high levels of omega 6 and omega 9 fatty acids. To these oils is added the required dose of vegetable squalene, a botanical lipid whose structure is similar to the natural oils in the skin and is therefore easily absorbed and assimilable. It prevents moisture loss, restoring the skin elasticity and flexibility. The result is a soft, silky and non-greasy sensation. Finally, we add several essential oils – **sea fennel oil** and **citrus oils** (orange, lemon grass and grapefruit) that act in synergy reaffirming the skin and providing a balanced aroma.

*RECOMMENDED for mature skins prone to sagging that require a deep skin nutrition.*

**RESULTS:** wrinkles are filled and smoothed in order to achieve a uniform and bright skin.

FORMULATED FOR PROFESSIONAL CABIN USE

## MASSAGING SERUM

### Marine Cell Regul·Oil

The Regul Oil cabin treatment serum is inspired by the traditional Chinese Philosophy (TCM) that regulates sebum excess and oil from the skin through a selection of specific oils.

The perfect combination of Neem and Tea tree antiseptic oils makes it a highly effective treatment as well as the presence of **REGU®SEB** active complex.

The formulation is completed with **safflower oil, borage and Camellia oils**, which provide all the necessary nutrients to moisturize, nourish and treat wrinkles, thanks to the high concentration of Vitamin E, omega 6 and other essential biomolecules.

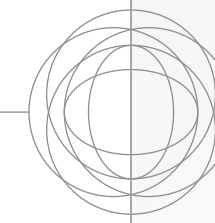

The drainage properties of **sea fennel essential oil** enhance the effect of the rest of the ingredients.

*RECOMMENDED for oily and acne-prone skins.*

**RESULTS:** A continuous treatment clog the enlarged pores

FORMULATED FOR PROFESSIONAL CABIN USE

## TREATMENT CREAM

### Marine Cell Regul·Oil

A powerful treatment cream formulated for professional and daily use. It is indicated to treat oily, mixed and acne-prone skins. It contains the effective active complex **ALP®-SEBUM** which regulates the production of sebum, closes the pores and provides a non shiny appearance.

Salicylic acid grants this cream keratolytic properties ideal for skins that suffer inflammatory processes by the buildup of microorganisms. **Moringa oil** is a source of Vitamin C and very effective against blackheads and spots. The addition of high and low molecular weight **hyaluronic acid** ensures the necessary moisture from the inside while treating wrinkles and fine lines.

The marine touch is achieved by inserting the **Mar Menor salt** (cocktail of minerals and trace elements such as calcium, copper, iron, magnesium and zinc) and the powerful and skin firming sea fennel essential oil.

*RECOMMENDED for oily and acne-prone skins.*

**RESULTS:** Sebum production is balanced while the skin achieves a matt appearance.

**APPLICATION:** Apply 1-2 times daily after deep skin cleansing.
