Manufacturing Process

In ILUMINIA we select all the elements that go to make up our lights (LED chips, lenses, heat sinks and electronic) subject to different tests, so we get products that not only offer the confidence and durability expected, but provide a real solution lighting, providing improved replacement of traditional fixtures.

In our R & D we check all aspects involved in proper lighting (lumens, CRI, opening angles, power factor and color temperatures).

Similarly, regularly visited manufacturing plants, which must have been previously approved, to control the assembly process and check the quality standards required. And finally, we submit our luminaires to all kinds of tests to certify the quality of them.

Key Differentiating Features

Our products are tested in laboratories in Spain and throughout the process supervised by professionals of our brand.
