Manufacturing Process

Bolaseca has one of the most diverse product collections and are the best providers for all anti humidity, odour absorber requirements in the market. BOLASECA has been manufacturing and selling anti-humidity products since 1980. Our products are non-electrical dehumidifiers, air fresheners and odour absorbers. They come in a range of sizes and models and are made with calcium chloride crystals. It is a convenient, energy efficient, safe, clean and an effective solution to humidity problems.

Our products comply with all current regulations (REACH and CLP) and offer the highest quality standards in calcium chloride features and performance making a huge impact in the way they solve excess humidity problems.

Thanks to the nature and characteristics of our products, they can be applied and sold in many different industry markets: household stores, supermarkets, camping, caravans, hardware stores, boating

Key Differentiating Features

Our goal is to create products that solve moisture and odor problems through innovation. We strive to provide products that act faster, work harder and have the smallest possible impact on the environment, while providing the customer with great value.

We don't settle for products that are already in the market, we add an extra value to them improving any regular formula so that consumers can rely on our products as a unique and efficient solution.

Proof of this feature is that have been granted several patents in the last year.

etc.
