

CULMAREX, S.A.

Tax ID Number: A30106264

Firm founded in 1986 and located in Aguilas. This company is one of the largest in gilthead seabrine and seabass aquaculture in Spain. In 1990, the company was bought by a joint-venture society composed of Marine Farms AS, a Norwegian aquaculture multinational, and a Galician cement company that had diversified in aquaculture and was a pioneer in salmon and turbot in Spain. The firm stopped producing seriola and oysters to focus on gilthead seabrine and seabass. In 1996 it became 100% property of Marine Farms AS, and was converted into the largest floating cage hatcher in the Spanish Mediterranean, and one of the largest in Spain. Respect for the environment is a key part of operations, as they are acutely conscious of the benefits of hatching fish in high quality, unpolluted waters. These benefits include faster and more efficient growth, fewer problems with illness and a high quality final product. Experience shows that customers are willing to pay a higher price for Culmarex fish, prepared to satisfy the strictest market demands. The company's brand "Dorada Real y Lubina Real" is especially appreciated for offering a product which is generally not available in today's market.
