To us at Distribuidora de Agroquímicos, experience is shown by the hands, by the work of men and women to know more about the land and its products, and the desire to find solutions for the fields and improve its products. We place our hearts in the fields, and search for the best products to be able to offer the best quality.

This experience has allowed our company to gradually grow until at the end of the 90s we were among the first in the sector, all done under the premise of quality and its protocols.
