

TRATAMIENTOS DUROS, S.L.

Tax ID Number: B30232102

This company is specialised in metal coverings (nickel plating, chrome plating, polishing, lacquering). This is down to two main factors: product quality in nickel plating, chrome plating, polishing and lacquering, all of which is done according to European licenses, and technical assistance and customer support. On the other hand, the company is always up to date, contributing to the increase in process productivity and cost reduction.

Sector: Other types of coating

Activity: Manufacturer, Services

Manufacturing Process

The most frequent and important order of metallic coatings is to protect other metals from corrosion. Other uses are: achieving a set of different properties that are not assembled in a metal or decorative purposes only.

We have an extensive range of decorative finishes, applying them in iron, brass, zamalt, aluminum, steel.
