

COAVANTIA, S.L.

COAVANTIA STONE

Tax ID Number: B73656142

Coavantia Stone, we are Spanish Factory and quarry owners of some of the most popular Spanish marbles, like [crema marfil](http://www.coavantiastone.net/marmol-827.html) and [dark emperador](http://www.coavantiastone.net/marmol-789.html). We control the Extraction activity for the natural stone, also the Manufacturing and the exportation process. We are specialized on the projects, in our technical office we optimize the drawings (autocad) and we recommend the best material to use in the different combinations. Therefore we sell The rough material (Marble Blocks), the Stone processed, (slabs polished, honed, brushed, etc.) and the cut to size according to the needs of our client and/or in standard sizes. Also we control when our clients require it the supervision of the installation and the transport to the Project (through shipping company agents).

Always apply the direction and supervision over the three processes is the direct control that gives us and helps to ensure:

- The higher quality of the natural stone.
- The maximum requirement and control in the production process of the Stone, that is reflected in excellent finishes.
- The best relation quality/price.
- Proper delivery time adapting ourselves to the time of the Project or distributor.
- Ensure our customers always get what they need and how they want.

We sell our product to the best manufacturers around all the world to process our blocks, also we sell our manufactured marble slabs and tiles to wholesalers in more than 76 countries, who distribute our products.

Our maximum mission is to grow up with our clients and we are very proud for all the projects done, private villas, big resorts, airports, hotels, casinos, palace, airports, malls, etc.

Venezuela, Vietnam, Yugoslavia (Serbia and Montenegro)

Manufacturing Process

Our manufacturing process covers all the steps of production of marble and / or natural stone. From the obtaining of the raw material in quarry to the installation on site. In our production plant we have all the machinery to carry out the whole process, once the marble block (crema marfil, dark emperador, all spanish marbles and marble blocks of importation) is transported from the quarry to the factory, without being dependent on third parties.

We have sawing and block cutting, carefully in the proper thickness with a meticulous quality control that is translated in perfect tolerances.

All the elaboration stage, consists of reinforcement of the marble, and the later finishing, polished marble, aged, apomazado, sprung, etc. The process of resining marble to obtain a mirror effect glitter, free of imperfections.

Once the material has been polished, the marble slabs passes to the cutting process on a disc by means of numerical cutting for millimeter accuracy.

Key Differentiating Features

Our differentiating value is to control the whole process from the quarry to the project site. We work in coordination with our clients, warehouses of material or constructors to watch over the final result of the material installed on site. We even supervise the installation and technical part of the project thanks to our technical office with engineers who advise on all the casuistic of each material.

The knowledge acquired in the hundreds of projects carried out around the world, makes us focus on what is really important, emphasizing key points such as the classification of the material by its tone, quality control, delivery time compliance, revision of plans and logistics control, our work ends when the project finish. Or when our warehouse clients get the perfect material ready to sell in their installation out of Spain.

A careful production coupled with the quality of our raw material such as Crema Marfil, Dark Emperador, Light Emperador, Black Marquina or Red Alicante (among other marbles) make us continue to grow together with our customers
