

J.R. SABATER, S.A.

Tax ID Number: A30022909

This firm has been solely dedicated to packaging wine vinegar since 1976. Initially, the company only packaged products from its direct providers. Later, a vinegar factory and quality control laboratory were also built on the premises, which gave the firm its current position of guaranteeing delivery even on occasions of high demand while promising the very best vinegar quality and composition. Parallel to these expansions, the firm perfected treatments for wholesaling vinegar. In 1987 this process was further improved by the addition of an unusual practice for the industry: pasteurization, which ensures the highest product quality. Currently, J.R. SABATER has an annual production capacity of 20 million liters of 10-grade vinegar. The company has also been certified by ISO-9002 since 1998.
