

**ELECTROMECAÁNICA AUTOMATISMOS JOMAR, S.L.**

Tax ID Number: B30131999

Over more than a decade, this firm has consolidated its activity within the automation of industrial processes, pneumatics and controls, as well as advanced programming, automatic lid securing and design and execution of electric installations for low and medium voltage. The company works in projects and specific tasks within the automation field for any application. Along another line of work, the firm also sells machinery for applying lids in thermotactile films for metal packaging firms. This machine was created in order to optimize universal lid packaging, regardless of the diameter or quantity of containers to be sealed. All of the firm's functions are performed through controls and verifying systems from the design process through the final touches in production, while each step is in accordance with ISO 9001 Quality System Management.
